

RA-Energy

RA-Energy Association Articles of Association (Statutes)

**Planetary Association for Decentralised Breakthrough Renewable
Electromagnetic Energy**

**Energy Independence and Service-to-Others (STO) Abundance for
the Highest and Best Good of All**

Non-profit Association under Articles 60 et seq. of the Swiss Civil Code

Seat: Préverenges, Canton of Vaud, Switzerland

c/o Joyti Goel, Chemin des Uttins 2, 1028 Préverenges, Switzerland

Adopted on 1 October 2026 · Version 1.0

English version. These Statutes are also adopted in French; the French version prevails in relations with Swiss authorities (Section 1.5).

Public edition · Contents: Part 1 – Statutes

PART 1: MASTER RECORD OF AGREED GOVERNANCE

FRAMEWORKS -----1

1. ARTICLE I: LEGAL FOUNDATION, SEAT AND ARCHITECTURE -1

1.1. Section 1.1 Corporate Form and Governing Law 1

1.2. Section 1.2 Name and Identity 1

1.3. Section 1.3 Seat and Official Physical Domicile 2

1.4. Section 1.4 The Board of Trustees and Governance.....2

1.5. Section 1.5 Official Language and Governing Text 3

1.6. Section 1.6 Definitions.....3

2. ARTICLE II: PURPOSE, CONSCIOUSNESS AND MISSION -----4

2.1. Section 2.1 The Oxygen Principle of Energy 4

2.1.1. The Core Definition of Inherent Rights.....4

2.1.2. The Unhoardable Principle 4

2.1.3. The Renewal Principle 4

2.1.4. The Free Principle 5

2.1.5. The Abundance Principle.....5

2.1.6. The Unalienable Principle 5

2.2. Section 2.2 Core Mandate.....5

3. ARTICLE III: THE VALIDATION FRAMEWORK AND SCIENTIFIC

METHODOLOGY -----7

3.1. Section 3.1 The Principle of Objective Alignment 7

3.2. Section 3.2 The Triple-Layer Peer Validation and Scientific Framework 7

3.3.	Section 3.3 Layer 1: The Unprecedented Hyper-Stringent Academic Peer-Review Framework.....	7
3.4.	Section 3.4 The RA-Energy Scientific Commission	8
3.4.1.	Candidates' Academic Qualification Criteria	8
3.4.2.	Candidates' Energetic Qualification Criteria	9
3.4.3.	The Founding Validator	9
3.4.4.	Dual Public-Private Roster Execution	9
3.4.5.	The Vibrational Transition and Art Basel Disclosure Mandate	10

PART 1: MASTER RECORD OF AGREED GOVERNANCE FRAMEWORKS

CONSTITUTION AND STATUTES OF THE
PLANETARY ASSOCIATION FOR
DECENTRALISED BREAKTHROUGH RENEWABLE
ELECTROMAGNETIC ENERGY (RA-Energy)

1. ARTICLE I: LEGAL FOUNDATION, SEAT AND ARCHITECTURE

1.1. Section 1.1 Corporate Form and Governing Law

There is hereby established a planetary non-commercial, non-profit association governed by the present Statutes and Articles 60 to 79 of the Swiss Civil Code (SCC). This entity shall operate as an independent private association, remaining unregistered with public commercial registries unless and until the explicit, irreversible milestone triggers defined in Article VIII, Section 8.3 are legally activated, or registration is required by law (Art. 61 para. 2 SCC).

1.2. Section 1.2 Name and Identity

The official name of the Association shall be the RA-Energy Association. Its descriptive title is the Planetary Association for Decentralised Breakthrough Renewable Electromagnetic Energy. All planetary operations, intellectual property protections, decentralised network validations, and cryptographic accounting protocols shall be executed exclusively under this denomination. All technical and community infrastructure

shall integrate decentralised, censor-free, surveillance-free, and private communications to protect the autonomous and confidential interactions of its members, in compliance with applicable law.

1.3. Section 1.3 Seat and Official Physical Domicile

The official seat, statutory headquarters, and administrative physical domicile of the Association are established in Préverenges, within the Canton of Vaud, Switzerland. For the purposes of corporate bank accounting, compliance auditing, and public-facing regulatory communications, the Association maintains its physical registration address at:

Chemin des Uttins 2, 1028 Préverenges, Vaud, Switzerland.

1.4. Section 1.4 The Board of Trustees and Governance

The Association shall be governed, managed, and legally anchored by a Board of Trustees, which shall constitute the Committee (executive body) within the meaning of Article 69 of the Swiss Civil Code. The Board consists of two Founders: Anil Goel, serving as the Trustee Guardian, and Joyti Goel, serving as the Executive Trustee. To ensure the safety, digital shielding, and systemic privacy of the Founders' wider family lineage, no other family members or relatives shall be named, registered, or associated with any legal ledger, asset registry, or public record of this ecosystem, except where required by law. Joyti Goel is hereby designated as the President of the Board of Trustees, vested with sole, individual signing authority to legally bind the Association in all matters, including financial and banking operations.

Each Founding Trustee may designate a successor in writing, to be kept in the Master Minutes Book. Upon the Founding Trustee's death, incapacity or resignation, the designated successor takes over their seat on the Board of Trustees and their voting rights in the General Assembly. Failing such designation, the remaining Founding Trustee designates the successor.

1.5. Section 1.5 Official Language and Governing Text

The official operating, administrative, and scientific language of the Association shall be English. All planetary operations, internal records, statutes, textbooks, and the Joint Commission Report shall be drafted and executed in English.

These Statutes are also adopted in French. The French version shall prevail in relations with the authorities of the Canton of Vaud and other Swiss authorities. In all other cases, the original English version shall remain the absolute, supreme, and legally governing text for all internal interpretations, private jurisdiction frameworks, and planetary ecosystem agreements. Translations into other languages are for information only.

1.6. Section 1.6 Definitions

In these Statutes, "sovereign human being operating as an autonomous individual" means a natural person with full legal capacity who acts of their own free will and on their own responsibility.

"Private jurisdiction framework" means the internal rules and procedures of the Association that apply among its members by virtue of these Statutes and the member agreements, without prejudice to the jurisdiction of the Swiss courts and to mandatory law.

The Association introduces new concepts and a new vocabulary for which no existing reference point exists. Words such as "equivalence", "equivalent" or "successor", used in relation to external systems (such as patent, treaty, monetary or cryptocurrency systems), serve as bridges to understanding and do not imply equivalent legal status.

References in the member agreements to the "Jurisdiction of the Courts of Equity" designate the private jurisdiction framework of the Association.

2. ARTICLE II: PURPOSE, CONSCIOUSNESS AND MISSION

2.1. Section 2.1 The Oxygen Principle of Energy

The Unhoardable, Renewable, Free, and Abundant Energy as an Inherent Right Belonging to Every Autonomous Human Being

2.1.1. The Core Definition of Inherent Rights

Inherent and unalienable rights are fundamental freedoms that belong to all sovereign human beings operating as autonomous individuals by birth and divine principle. These rights cannot be surrendered, sold, bartered, or stripped by any external human, institutional, or corporate entity. The Association adopts this principle as the immutable core of its planetary purpose.

The Association declares as its baseline truth that energy is fundamental to sovereign human beings operating as autonomous individuals, completely analogous to oxygen.

2.1.2. The Unhoardable Principle

The human physical body cannot hoard the oxygen within it for more than a few minutes, and even highly trained divers can hold their breath for only a limited time. Correspondingly, the Association's technological framework is created to prevent the monopolisation or hoarding of energy resources.

2.1.3. The Renewal Principle

The renewal of oxygen occurs through the photosynthetic process of plants and trees, which absorbs carbon dioxide from the atmosphere and releases clean oxygen back into the air. In perfect alignment with this natural cycle, the Association's systems are designed to facilitate the continuous, clean, and decentralised regeneration of energy.

2.1.4. The Free Principle

Just as oxygen is freely accessible to all sovereign human beings operating as autonomous individuals for the survival of their physical body, the Association operates under the mandate that fundamental energy must remain free from restrictive monetisation, exploitation, or artificial scarcity.

2.1.5. The Abundance Principle

Just as oxygen is universally present in abundance to provide prana (life force) to the entire human collective of approximately 8.2 billion sovereign human beings operating as autonomous individuals, the Association operates on the baseline rule that clean energy must be made available in boundless abundance to support and sustain all human life across Planet Earth.

2.1.6. The Unalienable Principle

The unalienable right to breathe oxygen for the survival of the physical body belongs inherently to all sovereign human beings operating as autonomous individuals. Consequently, the Association establishes that access to decentralised renewable energy is an inseparable, unalienable entitlement that cannot be infringed upon by any authority.

In direct alignment with the Oxygen Principle, unhoardable, renewable, and free electromagnetic energy is available in abundance to provide electric power to the human collective as an unalienable right belonging to all sovereign human beings operating as autonomous individuals. The Association exists to permanently dismantle the systemic denial of its existence, the systemic hoarding of energy, and the artificial economic scarcity. It achieves this by shifting the planetary energy grid into an unhoardable, decentralised model of real Service-to-Others (STO) economic abundance belonging inherently to all sovereign human beings operating as autonomous individuals and the human collective.

2.2. Section 2.2 Core Mandate

The primary objective of the Association is to initialise, fund, and protect the human collective initiative that provides complete technical know-how, engineering blueprints, and operational support for the deployment of the decentralised RA-Energy device.

This technology operates by extracting and transforming imperceptible electromagnetic energy into usable, real-world high-power electricity produced by decentralised RA-Energy devices independently owned by each user for their own needs, capable of satisfying local consumer, household, and industrial requirements. The deployment of the RA-Energy device is explicitly intended to act as a catalyst for a profound paradigm shift in human collective consciousness and energetic alignment. The Association assumes no operational or legal liability for the independent manufacturing, ownership, or use of the devices by sovereign human beings operating as autonomous individuals, to the extent permitted by law.

3. ARTICLE III: THE VALIDATION FRAMEWORK AND SCIENTIFIC METHODOLOGY

3.1. Section 3.1 The Principle of Objective Alignment

No external entity or individual can claim to scientifically validate the RA-Energy device unless they fully comprehend the foundational concepts and principles governing the fabric of reality. This reality operates efficiently, effectively, and independently of human belief systems, established scientific dogmas, and institutional indoctrination. It remains the absolute responsibility of the human collective to realign its scientific belief systems to conform to the true principles of the manifested fabric of reality, rather than attempting to force mass consciousness to conform to historical scientific ignorance and limitations.

3.2. Section 3.2 The Triple-Layer Peer Validation and Scientific Framework

To establish absolute mathematical integrity, eliminate subjective scientific dogma and institutional indoctrination, and prevent the historical suppression and stagnation of energy technologies, the deployment of the RA-Energy technology shall adhere to a strict, Triple-Layered verification process executed entirely within the private jurisdiction framework and governance ecosystem of the Association.

3.3. Section 3.3 Layer 1: The Unprecedented Hyper-Stringent Academic Peer-Review Framework

In parallel with physical prototyping, the underlying laws of physics and electromagnetic theories, along with the precise mathematical equations presented in the RA-Energy Theory Book, must undergo a rigorous academic peer-review process.

This first layer surpasses conventional validation formats, which typically require only two (2) to four (4) peers in standard international scientific publishing, by requiring a superior level of scrutiny necessitated by the Breakthrough nature of the RA-Energy Theory Book formally titled as:

RA-Energy “A Treatise on Breakthrough Electromagnetic Energy” AKA Breakthrough Free Energy (BFE) Textbook.

This work introduces an entirely new scientific era of Breakthrough Free Energy (BFE), fundamentally distinct from historical, unverified energy concepts. To establish its absolute legitimacy, the manuscript must be fully validated by exactly twelve (12) members of the RA-Energy Scientific Commission, establishing an unprecedented investigative standard equivalent in depth and rigour to a special parliamentary or congressional investigative committee, operating with absolute neutrality and without any political bias or influence from any ruling party or government regime.

3.4. Section 3.4 The RA-Energy Scientific Commission

A specialised committee of exactly twelve (12) qualified scientific peers and validators possessing a verified Service-to-Others (STO) energetic signature is hereby established. The appointment, technical qualification benchmarks, and energetic alignment of these twelve commissioners shall be assessed, evaluated, and approved by the Trustee Guardian under strict divine principles and spiritual guidance from 6th-Density Light beings, ensuring absolute systemic and cosmic integrity.

3.4.1. Candidates' Academic Qualification Criteria

ACADEMIC PROFICIENCY: Possess a minimum of a Master's level proficiency in electromagnetic theory and mathematical physics, with a demonstrable capability to formalise and clearly present complex physical principles;

COGNITIVE ADAPTABILITY: Demonstrate a distinct, proven capacity to actively unlearn legacy frameworks and rapidly assimilate new paradigms; and

DOGMATIC DEPROGRAMMING: Demonstrate the explicit psychological and intellectual capacity to deprogram from conventional scientific dogmas and institutional indoctrinations, consciously shifting their perspective from viewing contemporary scientific theories as absolute, immutable truths to recognising them strictly as evolving models and operational assumptions.

3.4.2. Candidates' Energetic Qualification Criteria

Candidates must possess a minimum 75% Service-to-Others (STO) energetic signature, ensuring a pure, cooperative inner drive to serve humanity entirely free from hidden motives of personal greed, recognition, or control. This alignment is an absolute prerequisite for the frictionless functioning of the Scientific Commission. This unfakeable energetic signature serves a critical dual-protective purpose: it structurally prevents any strategic infiltration by Service-to-Self (STS) individuals into the Association, while simultaneously providing a synergistic shielding effect that protects the integrity of the Association ecosystem.

3.4.3. The Founding Validator

The initial seat of the RA-Energy Scientific Commission is hereby occupied and anchored by its first member: Dr. Horst Eckardt (hereinafter the "First Validator"), a German physicist and researcher widely recognised for his extensive publications in mathematical physics and electromagnetic field theory, spanning over three decades of professional experience. Dr. Eckardt is designated as a verified Star Seed and Old Soul possessing a confirmed 75% Service-to-Others (STO) energetic signature. His established energetic alignment, history of absolute non-political collaboration, and down-to-earth behavioural actions over the preceding four years in coordination with the Trustee Guardian establish the baseline behavioural, moral, ethical and scientific criteria for all subsequent members of the Scientific Commission.

3.4.4. Dual Public-Private Roster Execution

Any Scientific Commission member who registers with the required qualifications reserves the absolute, freewill right of election to operate within either the Public Interface Layer or the Private Sanctuary Layer of the Association ecosystem until the official public release at Art Basel. Members who are retired, fully dwell in the light, and possess no locus of fear may choose to place their official legal names openly on the official public Scientific

Commission roster, as exemplified by Dr. Horst Eckardt, who successfully transitioned into dwelling in the light and becoming fearless through direct interaction with the Trustee Guardian and his own dedicated internal work to balance his energy centres (Chakras).

This public alignment supports Swiss bank onboarding and cantonal compliance, acting as an unassailable operational shield for the network. Conversely, Scientific Commission members currently active within traditional academic institutions or corporate laboratories may, until that release, reside under total cryptographic anonymity within the private registry, except where disclosure is required by law, remaining fully insulated from institutional persecution, cancel culture campaigns, blacklisting, or targeted economic reprisal.

3.4.5. The Vibrational Transition and Art Basel Disclosure Mandate

All Scientific Commission members operating within the Private Sanctuary Layer must be psychologically and energetically prepared to transition their operational status into the Public Interface Layer prior to the official public release of the Breakthrough Free Energy (BFE) technology.

This transition shall be harmonised and accelerated through direct interaction with the Trustee Guardian and the members of the Public Interface Layer who fully dwell in the light. This collaborative interaction is intended to elevate the private validators' vibrational frequency to the necessary level of fearlessness, fuelled by their first-hand experience of witnessing the Breakthrough Free Energy (BFE) technology in both its mathematical theory and its operational working prototype. The ultimate trigger for this total public disclosure shall be the historic exhibition and public release of the operational RA-Energy device at Art Basel, where all validators shall stand openly in the light to anchor the new light-spirit era for the human collective. By accepting a seat on the Scientific Commission, each member consents to the public disclosure of their official legal name at the Art Basel release.

3.4.6. The Learn/Teach and Teach/Learn Principle

The Commission operates under the unified cosmic law of reciprocal education, wherein the learner is the teacher and the teacher is the learner. This framework formally recognises that while the acquisition of new knowledge is straightforward, unlearning the

erroneous scientific dogmas and institutional indoctrinations of the past constitutes the primary obstacle. Consequently, the absolute surrender of obsolete paradigms and the willingness to let them go under the light of new knowledge is established as the key to smooth, rapid learning, operational alignment, and the collective evolution of consciousness.

3.4.7. Teaching

The Trustee Guardian, assisted by the First Validator of the Scientific Commission, shall personally teach the remaining eleven (11) Validator members of the Commission the breakthrough electromagnetic RA-Energy theory. These Breakthrough Free Energy (BFE) laws and principles, being completely absent from existing standard scientific literature, shall be administered under strict protocols of internal confidentiality and operational fidelity within the Association ecosystem.

3.5. Section 3.5 Blueprint Materialisation

Parallel to theoretical validation, blueprints extracted from the cellular memory of the Trustee Guardian shall be materialised. Physical prototyping and hands-on assembly of the RA-Energy device shall occur immediately alongside the First Validator. Upon full mastery of the foundational RA-Energy Breakthrough Free Energy (BFE) Textbook, remaining members of the Scientific Commission may opt to integrate directly into the RA-Energy device production framework.

3.6. Section 3.6 The Absolute Non-Human Attribution Mandate of the RA-Theory

The Association establishes as an unalterable foundational truth that the underlying science, mathematics, and physics formulas governing the ecosystem are Thought Forms generated by a Holographic Fragment of the One Infinite Creator. Consequently, no human credit, personal name, or individual authorship shall ever be attached, attributed, or titled to these discoveries.

The Board of Trustees and the Scientific Commission are strictly prohibited from referencing this science by any individual human name. It is an absolute, non-negotiable constitutional mandate that this body of knowledge be designated, spoken of, and

recorded exclusively as the RA-Theory or the RA-Energy Electromagnetic Theory, ensuring that the credit remains anchored solely to the One Infinite Creator for the collective benefit of humanity. This mandate concerns attribution and naming only, and does not affect the rights of the Association in the RA-Theory and all related works.

3.7. Section 3.7 Layer 2: The Forensic Analysis and Evaluation Framework

A formal written evaluation standard to accelerate the planetary proliferation of Breakthrough RA-Energy technologies is hereby established. Created as a functional equivalent to the international Patent Cooperation Treaty (PCT) framework, this second validation layer requires the execution of an exhaustive forensic analysis of the RA-Theory. This internal process produces definitive, audited technical reports that confirm the RA-Theory independent of conventional regulatory or proprietary restrictions.

3.7.1. Structured Evaluation Metrics and Prior Art Equivalence

This phase requires the execution of a structured evaluation metric detailing a chapter-wise catalogue of the breakthrough electromagnetic parameters, mathematical equations, and physical laws uncovered in the RA-Energy Breakthrough Free Energy (BFE) Textbook that are entirely missing from any published scientific literature.

The sheer quantity of these quantifiable breakthrough electromagnetic parameters, equations, and laws shall establish without a shadow of doubt that the RA-Theory is an original body of scientific theory and mathematical physics of an unprecedented nature in human history. This objective, structured evaluation shall contain negligible subjective analysis, setting a new planetary benchmark for technical auditing that explicitly surpasses existing conventional standards, such as the International Search Report generated under the Patent Cooperation Treaty (PCT) framework.

3.7.2. Precision Presentation and Novelty Equivalence

To definitively establish novelty equivalence, the formal evaluation report must be written in the precise language of mathematical physics. This enables an objective, quantifiable forensic comparison against all contemporary scientific literature. The execution of this

rigorous technical contrast serves to legally and scientifically seal the unique originality of the Breakthrough RA-Energy Theory.

3.7.3. Unattainable Prior Art Combinations and Inventive Step Equivalence

The presentation of a mathematically provable, original body of work that is entirely unattainable by any combination or configuration of prior art within existing scientific literature shall definitively seal the inventive aspect of the Breakthrough RA-Energy Theory. This framework establishes a formal Inventive Step equivalence within the private jurisdiction framework of the Association, demonstrating that the RA-Theory coherently extends classical theory in a highly advanced, non-obvious manner that has never been achieved in human history.

3.7.4. Physical Materialisation and Industrial/Household Reproducibility Equivalence

The physical manifestation of a real, reproducible, and engineerable working prototype, which empirically proves the existence of Breakthrough Electromagnetic Energy based on the laws uncovered in the RA-Energy Breakthrough Free Energy (BFE) Textbook, shall permanently seal the breakthrough nature of this original scientific theory.

The Association establishes this milestone as a definitive Industrial and Household Reproducibility equivalence within its private jurisdiction framework. By pairing the complete, unhidden mathematical laws of the Textbook with an openly verifiable, functioning physical model, this process naturally surpasses existing conventional benchmarks. It demonstrates through undeniable physical reality that the RA-Theory translates flawlessly and transparently into usable, self-sustaining technology for the collective benefit of humanity.

3.7.5. The Joint Commission Report and Written Opinion Equivalence

Upon completion of the forensic analysis, a Joint Commission Report shall be executed. This document shall serve as a formal, written, chapter-by-chapter evaluation confirming the complete mathematical validity of the RA-Energy Breakthrough Free Energy (BFE) Textbook. Formally signed and ratified by exactly twelve (12) Validator members of the Scientific Commission, this comprehensive report establishes an absolute Written Opinion

equivalence within the private jurisdiction framework of the Association, serving as the definitive technical wake-up call for the planetary ecosystem.

3.8. Section 3.8 Layer 3: The Unprecedented Public Release and Exhibition Framework

This third and final layer of the verification framework deploys a disruptive, innovative approach centred on absolute transparency and open display in the public arena. Formally created to facilitate close-quarters public witness and rigorous objective scrutiny, this final operational phase permanently establishes the absolute veracity, physical reality, and the existence of Breakthrough Free Energy (BFE) and the RA-Energy technology.

3.8.1. Public Release and Exhibition at Art Basel

The structured technical evaluations, the Joint Commission Report, and the operational RA-Energy device shall be simultaneously released and exhibited to humanity at the prestigious Art Basel exhibition.

To anchor this paradigm shift in absolute transparency, this public release shall include the disclosure of the official legal names of the twelve (12) Validator members of the Scientific Commission. This public showcase serves as the absolute catalyst to eradicate the scientific dogmas and deep-rooted indoctrinations prevailing in the mass human consciousness, demonstrating definitively that Breakthrough Free Energy (BFE) is real and represents the singular path forward for true human progress in the manifested reality on Planet Earth.

3.8.2. The Launch of the Physical Textbook

The physical RA-Energy Theory Book "A Treatise on Breakthrough Electromagnetic Energy" AKA Breakthrough Free Energy (BFE) Textbook shall be launched simultaneously with the public release and exhibition at Art Basel. This synchronised release shall provide immediate open-source access to the underlying physics and mathematics, inspiring the wider academic and scientific community to engage with the RA-Energy Scientific

Commission's Joint Commission Report and organically verify its objective, impartial, and unassailable foundations.

3.8.3. The Launch of the Learn/Teach and Teach/Learn Online Educational Program

In direct alignment with the cosmic law of Learn/Teach and Teach/Learn, a comprehensive online educational platform shall be launched simultaneously with the public release and exhibition at Art Basel.

This program serves as a positive catalyst to motivate the wider academic community and independent DIY builders across the planet to join this movement. By learning directly from the respected members of the Scientific Commission, participants can intuitively absorb the unified scientific vocabulary and verify the existence of Breakthrough Free Energy (BFE) for themselves, before becoming the teachers themselves of this breakthrough knowledge belonging to the human collective and proliferating it to the far recesses of Planet Earth for organic living in nature.

3.9. Section 3.9 The Birth of RA-Energy Association and the Rise of the Light Spirit Disruptive Approach

3.9.1. Historical Precedent of Open Presentation

The foundational frameworks of modern physics, including Maxwell's theory of electrodynamics, Einstein's theories of Special and General Relativity, Minkowski Spacetime, and Dirac Algebra, all required rigorous conceptual and mathematical peer review and validation prior to physical application.

The Association highlights that during those foundational eras, the scientific community possessed the structural freedom to present original work openly in the public domain, entirely free from the scientific dogmas and institutional indoctrinations that have come to prevail over the last century. Consequently, the Association establishes its private jurisdiction framework to restore this historical standard of pure, unrestricted scientific inquiry for the RA-Theory.

3.9.2. Safeguarding Against Institutional and Geopolitical Overreach

In direct contrast to the classical scientific freedom and cooperative open debate of earlier eras, the contemporary landscape faces significant institutional pressures, dogmatic distortions, and unprecedented geopolitical overreach. The Association explicitly notes the coordinated constraints and persecution observed in other scientific fields, including the medical and environmental industries, where independent practitioners and researchers have faced systematic suppression and persecution. To insulate the RA-Theory and its validators from this prevailing environment of institutional degradation and corruption, the Association establishes its autonomous private jurisdiction framework as a necessary defensive shield to preserve absolute scientific integrity and operational security.

3.9.3. Dawn of a Light Spirit Era and the Realignment of Science

Guided by the 6th-Density vibration of unification of love and wisdom, the Founding Trustees gave birth to the RA-Energy Association to Right the Scales.

From the darkness of unprecedented institutional degradation, corruption and systemic inertia rises the light spirit disruptive approach of human ingenuity to find solutions and a way forward for the progress in the manifested reality and the evolution of human collective consciousness.

3.10. Section 3.10 Overcoming Historical Failure

The Association acknowledges historical inventors who successfully intercepted renewable electromagnetic energy but failed to achieve reproducible proliferation, either due to withholding critical information and specifications for personal gain, or due to a lack of engineering comprehension regarding the accidental phenomena they triggered. To pierce this hamster wheel effect that has stagnated progress in the energy sector for the last 120 years, a systematic scientific approach shall be enforced against all odds.

3.11. Section 3.11 Underground Inventors and Safe Proliferation Pathways

The Association recognises that there are currently a few genuine independent inventors with working prototypes who have successfully intercepted renewable electromagnetic energy but remain underground due to the fear of death and persecution. Being unable to unblock and balance their Energy Centres (Chakras), they struggle to purge the fear of death and persecution and dwell in darkness.

To support these genuine inventors, the Association grants an open, voluntary invitation to join the movement on their own volition, strictly contingent upon the formal signing of the RA-Energy Private Membership Agreement. Alternatively, an inventor may opt to donate, under a written donation agreement, their working prototype along with its detailed description and schematics as a candidate for Art Basel and a First Generation RA-Energy device to the RA-Energy Association as an act on the Service-to-Others (STO) pathway to accelerate the incoming energetic alignment of mass human consciousness.

The Association shall exhibit the collection of working prototypes received, if any, at Art Basel with due credit to each inventor. This shall act as a proof and a reminder for generations to come of the poisonous effects of the scientific dogmas and institutional indoctrinations that have been choking and stifling the true progress of the human collective.

3.12. Section 3.12 Early-Stage Support and Early Adoption Proliferation Pathways for Nation States

The Breakthrough RA-Energy is a true Green, Clean, and Renewable energy. It requires neither huge land or sea farms nor any storage batteries, which negatively impact the environment. The energy itself is entirely free, resulting in an almost negligible cost per kilowatt-hour (kWh) derived solely from the cost of the RA-Energy device amortised over its lifetime. The breakthrough RA-Energy device is a true, on-demand, decentralised Breakthrough Free Energy (BFE) device.

3.12.1. Net Zero Emissions Targets

Breakthrough RA-Energy, operating without any of the negative environmental side effects of legacy solar and wind technologies, is in direct alignment with the 107 nation states (as at 2026) that have formally adopted net-zero emissions targets through binding laws or national policy documents. Breakthrough RA-Energy is the only viable solution and definitive path forward for a true Win-Win-Win for all parties involved: Nation States-Sovereign human beings operating as autonomous individuals-Planet Earth.

For the 38 nation states (as at 2026) that have discussed, proposed, or considered net-zero targets in varying capacities but did not adopt them due to the negative impact on their nation's economy and citizens, Breakthrough RA-Energy completely neutralises all concerns and objections. Breakthrough RA-Energy is the only viable solution and definitive path forward that opens the new door for their adoption, delivering a true Win-Win-Win for all parties involved: Nation States-Sovereign human beings operating as autonomous individuals-Planet Earth.

3.12.2. The New Messiah Artificial Intelligence

Artificial Intelligence is spreading at warp speed into every sphere of human existence. It is power-hungry, both literally and figuratively. Humongous data centres are popping up everywhere almost overnight, disturbing the ecological balance and the lives of Sovereign human beings operating as autonomous individuals around them. This is at loggerheads with net-zero emissions targets. It exposes the cognitive dissonance and hypocrisy of the Service-to-Self (STS) energetic signature.

Even the new Messiah of Homo Sapiens needs energy, massive amounts of energy. Breakthrough RA-Energy is the only viable solution and the definitive path forward.

3.12.3. The Fantasy of Space Travel And Colonies

One must realise that there is no space travel possible without Breakthrough Free Energy. Space travel and setting up colonies on the Moon or Mars are pure rhetoric of folly and an ego trip of those in power, when they can't even manage Planet Earth properly without wars and true freedom for all Sovereign human beings operating as autonomous individuals. The power-hungry Service-to-Self (STS) mindset is only going to create the

same chaos in space as well, if and when they get there by their covert and secret technology.

Charity begins at home. Rather than spending billions of dollars on dead-end wars and opium cycles, which only bring misery for all parties involved, use those billions with love and wisdom of Service-to-Others (STO) emotional pathways to nurture Planet Earth first by learning to live in harmony, peace and true freedom for all Sovereign human beings operating as autonomous individuals before venturing out in space to create new Sanctuaries with a true evolution of the mass consciousness of the human collective.

3.12.4. An Open, Voluntary Invitation

The Association extends an open, voluntary invitation to any Nation State possessing a Service-to-Others (STO) energetic signature that resonates with the Association's purpose, consciousness, and mission. Any such nation, acting entirely on its own volition, may opt to provide unconditional government grants and robust legal protections or safe haven to the Association, in compliance with applicable Swiss and international sanctions law. This collaboration serves to facilitate the early adoption and rapid proliferation of the RA-Energy device, securing absolute energy independence and abundance for the highest and best good of its citizens and the human collective.

Such Pioneering Vanguard Nation States become an unassailable lighthouse and a beacon for other Nation States to follow, demonstrating in physical reality the true Service-to-Others (STO) government signatures that every administration claims to possess.

The RA-Energy device shall be exhibited simultaneously with Art Basel across all Pioneering Vanguard Nation States on this pathway. The RA-Energy ecosystem shall grow organically through total alignment with the incoming energetic shift of Planet Earth. This energetic shift can already be felt and witnessed in the open defiance of sovereign human beings operating as autonomous individuals against the scientific dogma and institutional indoctrination of other scientific fields and legacy Service-to-Self (STS) government institutions in Europe and the United States.

3.13. Section 3.13 Early-Stage Support and Early Living Proof Proliferation Pathways for Organisations and Corporations

The Association extends an open, voluntary invitation to Service-to-Others (STO) organisations and corporations that resonate with the Association's purpose, consciousness, and mission. Any such entity, acting entirely on its own volition, may opt to provide unconditional grants to the Association, in compliance with applicable Swiss and international sanctions law, and may become an early Living Proof deployment site for the RA-Energy device and an unassailable lighthouse and a beacon for other Service-to-Others (STO) organisations and corporations to follow.

4. ARTICLE IV: OPERATIONAL ADVISORY AND PROTECTIVE TEAMS

To ensure total structural security, systemic compliance, and strategic deployment, the Association shall mobilise specialised operational teams operating initially on a strict need-to-know basis within their respective fields.

4.1. Section 4.1 Legal Advisors and Canton of Vaud Interaction Team

The Board of Trustees shall extend open invitations to qualified legal advisors inside Switzerland. This team is tasked with refining the legal syntax of these Statutes to ensure flawless compliance with the Swiss federal and cantonal legal frameworks. They shall format all relevant documentation to conform precisely to the formal requirements of the Canton of Vaud, international treaties, or legal evidence standards required in formal court proceedings.

4.2. Section 4.2 Swiss Government Interaction Team

A dedicated liaison unit shall manage formal communications with federal and cantonal regulatory bodies, ensuring the Association's operations remain structurally isolated yet transparently legal within the Swiss Confederation.

4.3. Section 4.3 Art Basel and Fondation Beyeler Interaction Team

A cultural alignment team shall handle specialised outreach, conceptual positioning, and collaborative public awareness frameworks leveraging high-level artistic and philosophical platforms like Art Basel and the Fondation Beyeler to prepare mass consciousness dynamics for the incoming paradigm shift in human collective consciousness and energetic alignment.

4.4. Section 4.4 Financial Advisory Team

A specialised group of financial experts shall oversee the non-commercial capital architecture, managing private donations, resource allocations, and planetary treasury distributions under strict divine principles and sovereign asset protection protocols.

4.5. Section 4.5 Blockchain Advisory Team

A technical blockchain and cryptography team shall develop, secure, and maintain the decentralised, ledger-based accounting (in compliance with Swiss bookkeeping requirements), censorship-resistant communication infrastructure, and cryptographic verification nodes necessary to keep the planetary ecosystem immutable and free from external surveillance.

4.6. Section 4.6 Native Blockchain and Utility Tokens Legal Compliance Team

A specialised group of legal experts in Blockchain and Utility Tokens compliance inside Switzerland shall oversee that the RA-Energy Utility Token not only complies with Swiss laws and the official FINMA Guidelines but also passes the Howey Test, the United States standard widely referenced by regulators across Planet Earth to differentiate between a utility token and a security token.

RA-Energy shall set an unprecedented new standard for utility token use and execution by implementing its strict Living Proof Mandate for every participant by demonstrable action, to establish the long-awaited unassailable Service-to-Others (STO) abundance model for the human collective reflecting true Service-to-Others (STO) energetic alignment.

4.7. Section 4.7 Systemic Safeguards, Emergency Relocation and Asset Protection

To insulate the ecosystem from external geopolitical anomalies, arbitrary state interventions, or weaponised campaigns targeting the Board of Trustees and its members, the Association establishes the following internal emergency protocols:

4.7.1. The Ninety (90) Days Structural Relocation Mandate

In the event that regulatory actions within the Swiss jurisdiction threaten to restrict, outlaw, or arbitrarily dissolve the RA-Energy Association, the Board of Trustees is legally empowered and mandated by these Statutes to execute an immediate, unhindered migration of the Association's legal seat, intellectual properties, and digital architecture to an alternative sovereign host nation or safe-haven jurisdiction, in accordance with Article 163 of the Swiss Federal Act on Private International Law.

4.7.2. Cryptographic Asset Shielding

As a vital response to contemporary planetary financial overreach including the arbitrary freezing of private bank accounts and donor contributions during public disputes, the Blockchain Advisory Team (Section 4.5) must maintain real-time redundancy systems. The Board of Trustees reserves the absolute right to instantly convert, transfer, or secure the Association's operational reserves into decentralised, un-freezable cryptographic formats to protect donors, light-bearing supporters, and members from systemic harassment or asset seizures, provided that no asset subject to a lawful court or authority order is concerned.

4.8. Section 4.8 Governance of Executive Technical Drafts

The Trustee Guardian shall independently author and issue the baseline white papers, operational draft outlines, and technological methodology documents for every operational area, ensuring all developments remain aligned under strict divine principles and spiritual guidance from 6th-Density Light beings.

5. ARTICLE V: THE DECENTRALISED PROTOCOL AND PRANA FINANCIAL MATRIX

5.1. Section 5.1 The Prana Principle

The financial architecture of the ecosystem rejects all legacy mechanisms of engineered debt, interest manipulation, and speculative hoarding. The native RA-Energy Utility Token operates strictly on the Prana Principle of Capital (Breathe In, Breathe Out). The RA-Energy Utility Token is a collective utility asset designed to remain in constant, fluid movement through active trade and mutual service.

There is no mathematical scarcity of RA-Energy Utility Tokens; as more sovereign human beings operating as autonomous individuals participate, the Service-to-Others (STO) abundance economic network expands dynamically for all members similar to an expanding Fibonacci spiral embedded in the fabric of reality everywhere.

Like river water, which turns stagnant when it stops flowing, the RA-Energy Utility Token must keep moving. To honour the Unhoardable Principle, RA-Energy Utility Tokens that remain unused beyond a period defined in the token terms shall gradually flow back into the Community Service-to-Others (STO) Abundance Pool (Section 10.1), as disclosed to every participant before acquisition.

5.2. Section 5.2 Token Architecture and Community Price Discovery

The RA-Energy Utility Token shall be introduced to the market via an Initial Coin Offering (ICO) deployed across the Decentralised Finance (DeFi) ecosystem in a fair, transparent, and non-custodial manner, in compliance with applicable Swiss financial market law.

5.2.1. The High-to-Low Auction Mechanism

To completely mitigate the predatory influence of sniper bots, front-running algorithms, and large-scale whale investor manipulation, the token distribution shall utilise a high-to-low pricing model akin to a Swiss/Dutch Auction, where prices begin at an elevated baseline and gradually decrease over time.

5.2.2. Sovereign Value Alignment

This framework allows interested participants to engage in organic, community-driven price discovery, acquiring tokens at a specific price point they determine to be equitable. This dynamic pricing structural constraint ensures utility token entry is reserved exclusively for entities genuinely dedicated to active participation within the RA-Energy ecosystem.

5.2.3. Planetary Equivalence Standard

The RA-Energy Utility Token is established as a sovereign utility standard of the human collective for RA-Energy operations. Upon completion of the regulatory requirements for its use as a medium of exchange between sovereign human beings operating as autonomous individuals, it shall additionally function as a decentralised cryptographic Service-to-Others (STO) successor to historical petrodollar systems and to Bitcoin, free from their Service-to-Self (STS) distortions.

5.3. Section 5.3 Disruptive Non-Volatile Portfolio Exchange and Non-Custodial Onboarding Covenants

All existing Decentralised Finance (DeFi) participants, token holders, cryptocurrency network participants, liquidity pool operators, and digital asset exchanges are granted an open voluntary invitation to integrate with the collective.

5.3.1. Disruptive Non-Volatile Swap Portfolio Exchange

External entities may exchange their existing asset portfolios for the RA-Energy Utility Token based upon a disruptive immutable, mathematically sound, non-volatile swap protocol executed purely peer-to-peer via decentralised smart contracts, in compliance

with applicable Swiss financial market law. Execution of this exchange is strictly contingent upon the formal signing of the RA-Energy Private Membership Agreement and the complete adoption of the Living Proof self-power mandate.

5.3.2. Special Purpose Liquidity Pool Orchestration for Fiat Currency Swap

Upon completion of the regulatory requirements for the use of the RA-Energy Utility Token as a medium of exchange, any participant may interface with decentralised, non-custodial liquidity pools to exchange member state fiat currency for the RA-Energy Utility Token or vice versa based upon a disruptive immutable, mathematically sound, non-volatile exchange protocol.

5.3.3. The Parity Standard

The protocol shall enforce parity between buying and selling rates of fiat currency, subject only to a Flat-Fee Standard. This is only attainable with the RA-Energy Service-to-Others (STO) abundance model of an advanced co-operative society.

5.3.4. Network Effect Scaling

The Flat-Fee Standard shall scale inversely with network effects; as overall planetary transaction volume increases, the RA-Energy architecture shall, in the medium-of-exchange phase, stabilise as an autonomous stable medium of exchange in its own right, by the power of the belief that sovereign human beings operating as autonomous individuals place in it, reflecting true incoming Service-to-Others (STO) energetic alignment and a true Service-to-Others (STO) abundance network where every point touches every other point on an outward-expanding spiral and everybody serves self by serving others.

5.4. Section 5.4 The Native DePIN Cloud Infrastructure

The Association explicitly prohibits any structural dependency on centralised, mainstream corporate cloud data centres, tech monopolies, or public server providers, recognising their ability to arbitrarily terminate services as a systemic single point of failure.

5.4.1. Self-Powered Network Architecture

The Association shall initialise its own clean, sovereign Decentralised Physical Infrastructure Network (DePIN). This cloud and server architecture shall be hosted entirely on localised, self-powered servers owned, protected, and maintained by the members themselves, whether in the Private Sanctuary Layer or the Public Interface Layer.

5.4.2. Open Merger Invitation

External existing DePIN blockchain networks are granted an open voluntary invitation to become part of the RA-Energy ecosystem only if they formally execute the Private Membership Agreement and adopt the Living Proof self-power mandate.

5.5. Section 5.5 Proof of Work (PoW) Node Consensus Infrastructure

The Association embraces a foundational return to purely decentralised verification, identifying Proof of Work (PoW) as the only viable consensus mechanism and path forward for absolute blockchain security, censorship resistance, and true decentralisation to safeguard the sovereignty of sovereign human beings operating as autonomous individuals.

5.5.1. Peer-to-Peer Electronic Cash Framework

In alignment with primitive cryptographic truths, and in the medium-of-exchange phase, the RA-Energy network shall enable sovereign human beings operating as autonomous individuals to transfer value directly to one another, peer to peer, without any centralised financial institution acting as an intermediary.

5.5.2. Energy Blackout Insulation

Due to the baseline deployment of the renewable electromagnetic RA-Energy device, the standard environmental and energy-cost concerns traditionally associated with PoW are completely neutralised. The PoW consensus mechanism within this ecosystem provides an ultimate consensus layer free from any single point of failure, maintaining full operational integrity even during a total external electrical grid blackout.

5.6. Section 5.6 Functional Programming Paradigm and Code Evolution

Because the planetary shift is still obscured by systemic fog and a progressively thinning energetic veil, the underlying software protocols of the network ledger shall be structured as a living, evolving Work in Progress.

5.6.1. Eradication of Smart-Contract Vulnerabilities

To completely eliminate the severe security vulnerabilities, compiler and custom ASIC exploits, and synchronous bottlenecks associated with legacy smart-contract frameworks like Solidity, and to enable massive transaction throughput at lightning speed, the network ledger shall, for Generation 1, be built using a Functional Programming Paradigm, with technologies such as Scala, Akka/Pekko Actor Frameworks, and Parallel Process JVM Computing.

5.6.2. Throughput and Fault Tolerance

This strict architecture ensures absolute mathematical proof of security, asynchronous fault tolerance, and massive parallel throughput across millions of concurrent planetary validation nodes and transactions at lightning speed.

5.7. Section 5.7 The In Lak'ech FIFO Consensus Layer For Transactions

In direct alignment with the cosmic law of In Lak'ech ("I am you and you are me"), the network ledger denies any form of capital-based prioritisation, transaction-fee bidding, or gas-price manipulation.

5.7.1. The Flat-Fee Standard

Every single transaction processed on the ledger shall incur an absolute Flat, Fixed Transaction Cost, completely independent of the underlying token volume or transactional size, subject only to the Network Effect Scaling in Section 5.3, ensuring a perfectly flat, first-in-first-out (FIFO) execution sequence for all sovereign human beings operating as autonomous individuals.

5.7.2. Un-Riggable Arbitrage-Free Standard and Haram-Free Code Equivalence

With the eradication of all vulnerabilities and ill practices from the RA-Energy native sovereign blockchain, the protocol shall implement an un-riggable Arbitrage-Free Standard. In direct alignment with the Islamic prohibition (Haram) of Maysir (where one person's gain is another person's loss) and the Service-to-Others (STO) emotional pathway, this standard is only attainable within the RA-Energy Service-to-Others (STO) abundance economic model of an advanced co-operative society.

5.8. Section 5.8 Open Retail Gateway

With the RA-Energy Service-to-Others (STO) Abundance Network in place and capable of handling millions of transactions at lightning speed, and upon completion of the regulatory requirements for the use of the RA-Energy Utility Token as a medium of exchange, any existing commercial and private retailer on Earth selling software services, hardware components, or any physical everyday consumer goods and services is granted an open voluntary invitation to join the non-commercial co-operative Association.

By pricing their inventory natively in the RA-Energy Utility Token and entirely disconnecting from zero-sum legacy banking matrices, they instantly transform their retail premises into active, self-sustaining conduits of the planetary Service-to-Others (STO) abundance network free from the reins of the Service-to-Self (STS) financial enslavement system and digital control grid.

6. ARTICLE VI: SOVEREIGN CENSOR-FREE SURVEILLANCE-FREE PRIVATE COMMUNICATION

The Core Definition of Freedom of Private Social Interaction and Communication: the unalienable right to censor-free, surveillance-free private interaction and communication with complete data ownership retained exclusively in personal custody of interacting sovereign human beings operating as autonomous individuals.

6.1. Section 6.1 Complete Peer-to-Peer Data Autonomy

The Association explicitly prohibits the use of centralised, commercial, or compromised third-party communication applications recognising them as primary tracking vectors for state coercion and leadership crackdowns. Once operational, all internal communications, blueprint data streams, and member coordination must occur exclusively on the native RA-Energy Sovereign Communication Platform.

6.2. Section 6.2 Decentralised Serverless Architecture

This communication platform must operate strictly as a self-hosted, decentralised, peer-to-peer mesh network running on the members' local, self-powered server iron, on the Native RA-Energy sovereign DePIN network, or on both. The Association shall maintain no centralised data caches, message repositories, or metadata tracking logs on this platform, keeping absolutely nothing on record there except each member's Unique ID only.

6.2.1. Systemic Decapitation Defiance

Because there is no central server and no singular leader of the network, there is no figurehead for hostile actors or state organisations to target. Every sovereign human being operating as an autonomous individual decides entirely for themselves.

6.2.2. Custody of Cryptographic Assets

Cryptographic Keys are held exclusively in the members' personal custody; they manage their own keys autonomously. The Association possesses no member keys or data outside the verified Unique ID.

6.3. Section 6.3 Sovereign Architecture for Private Communications

6.3.1. The Architectural Shield of Dual-Layer Technology Stack

To safeguard the freedom and inherent, unalienable rights of the human collective, the ecosystem integrates a dual-layer parallel technology stack created to preserve absolute data ownership.

6.3.2. Independent Pre-Launch

The following two technologies have been developed by the Trustee Guardian, personally and independently of the Association, alongside the writing of the RA-Energy Theory Book, and will be launched by him: (1) a censor-free and surveillance-free communication platform utilising an entirely disruptive cryptographic key pair algorithm for public-private key infrastructure, and (2) the disruptive non-volatile cryptocurrency swap protocol.

6.3.3. Real-World Proving Grounds

These two foundational technologies shall initially be released into the open market without any formal or visible connection to the RA-Energy ecosystem. This ensures they achieve successful, standalone real-world utility in their own rights, helping sovereign human beings operating as autonomous individuals maintain their freedom and unalienable rights, their privacy and data sovereignty before they are donated to the Association and structurally integrated into the broader RA-Energy ecosystem. Upon the

donation, existing users who are not already members shall have the choice either to join the RA-Energy collective or to discontinue their use.

7. ARTICLE VII: DECENTRALISED MANUFACTURING AND OPERATIONAL COVENANTS

7.1. Section 7.1 Anti-Monopoly MSME Production Caps

To permanently prevent the consolidation of power by centralised corporate entities, cartels, or hostile states, to ensure that many small producers, rather than a few, can earn a respectable and dignified living, free from greed, to support the self-reliance of every country, and to spread risk so that the loss of any single factory does not disrupt supply, the Association enforces a strict manufacturing volume restriction across the network.

7.1.1. The 1,728,000 Capacity Cap

As a condition of the licence to manufacture the RA-Energy device granted by the Association, and in compliance with applicable competition law, no single manufacturing unit, assembly module, or Micro, Small, and Medium Enterprise (MSME) within the community network may produce more than 1,728,000 hardware units per calendar year.

7.2. Section 7.2 Ownership Transparency and Clean Title Mandate

The Association explicitly prohibits any form of indirect controlling structure by tiered or parent-subsidary-grandson Service-to-Self (STS) structures for MSMEs within the network.

To permanently eradicate Service-to-Self (STS) outside interference and manipulation, and to ensure ownership transparency free from outside liens, encumbrances, and operational hurdles, the Association enforces strict ownership transparency with 100% control by individual sovereign human beings operating as autonomous individuals and a clean title mandate for MSMEs to ensure smooth operation across the network.

7.3. Section 7.3 The Sovereign Token Mandate

As a condition of the manufacturing licence, the Association enforces a strict mandate for MSMEs to sell every physical RA-Energy device directly to RA-Energy Utility Token holders by pricing RA-Energy devices natively in the RA-Energy Utility Token with an authentic Non-Fungible Token (NFT) provenance tag on the native sovereign blockchain to guarantee absolute authenticity, quality control, and tracking provenance.

The sale of any RA-Energy device outside the RA-Energy ecosystem constitutes an immediate systemic violation, resulting in the instant revocation of operational status and network membership. As a rule, the Association does not resort to litigation; it informs the community factually of the revocation, and every member remains free to refuse any dealings with the revoked party. Service-to-Self (STS) traits have no place within the ecosystem; they are not the path the collective has chosen. The revocation is executed without grudges, without emotional charge, and with full, absolute forgiveness and forbearance.

7.4. Section 7.4 Decentralised Working Capital and Supply Chain Provenance

The Association recognises that in the initial implementation phases, local electronics components and specialised raw materials may not be uniformly available or affordable in every territory.

7.4.1. Working Capital Pool Orchestration

To ensure that localised financial constraints never prevent small, highly skilled micro-manufacturers from establishing local assembly plants, the Association shall coordinate the sourcing and non-custodial financing of the Bill of Materials (BOM) utilising a decentralised Working Capital Pool.

7.4.2. The Zero-Fee Franchise Framework

The Association will collectively negotiate wholesale pricing for all raw components, operating as a planetary decentralised franchise model that is completely free of franchise fees, royalties, or centralised corporate control.

7.4.3. Cryptographic Provenance

Every single part sourced or financed through this matrix must come embedded with a unique Non-Fungible Token (NFT) on the native sovereign blockchain to guarantee absolute authenticity, quality control, and tracking provenance.

7.5. Section 7.5 Capital Expenditure (CapEx) Financed Liquidity Pools

To support long-term loans for capital needs to convert existing MSMEs into self-contained, integrated production lines under one roof, and to fund the technical blockchain infrastructure, the Association shall manage specialised funding allocations for required machines and computer systems procurement.

7.5.1. Capital Goods Liquidity Pool Orchestration

The network architecture provides a specialised liquidity pool protocol, funded from the Association's own resources and donations, and, where permitted by law, from contributions of RA-Energy Utility Token holders, to facilitate long-term loans for equipment, tooling, machinery and blockchain computer systems.

7.5.2. Zero Interest Rate Mandate and Riba-Free Code Equivalence

In direct alignment with the Islamic prohibition (Haram) of Riba (interest on loans) and the Service-to-Others (STO) emotional pathway, these allocations carry a strict zero percent (0%) interest rate. The loan repayments are automated via smart contracts embedded within the manufacturer reward matrix.

7.5.3. Voluntary Abundance Donations

Every action within this framework feeds back into the RA-Energy ecosystem to promote community Service-to-Others (STO) abundance. Manufacturers may pay donations into the liquidity pool on a purely voluntary basis from their share of the rewards matrix, utilising whatever amounts they find equitable as a token of grace and gratitude to accelerate the collective Service-to-Others (STO) paradigm shift.

7.6. Section 7.6 The Living Proof Mandate

Participation in the supply chain as an authorised manufacturer, component supplier, capital goods supplier, private university, technical consultant, or social awareness light-bearer is strictly conditional upon the absolute physical demonstration of the technology.

7.6.1. The 100% Off-Grid Mandate

Once RA-Energy devices are available to it, every participating entity must run its entire physical premises, assembly lines, offices, data centres, and campuses one hundred percent (100%) on the RA-Energy device hardware.

7.6.2. The Violation Threshold

Once the 100% Off-Grid Mandate applies, the retention of any active grid connection or standby line to a public, state-controlled utility corporation constitutes an immediate systemic violation, resulting in the instant revocation of operational status and network membership. Every facility must stand as a functional, independent, off-grid sanctuary of living proof.

7.7. Section 7.7 No Planned Obsolescence and Right to Repair Mandate

The Association enforces a strict no planned obsolescence and right to repair Mandate to eradicate plunder mentality, enabling the revival of true craftsmanship and true ownership to drastically reduce e-waste and environmental pollution of Planet Earth.

All RA-Energy devices are built to last and are fully repairable, designed for a minimum operational lifespan of twenty-five (25) years. This directly feeds more abundance into the Service-to-Others (STO) abundance economic network of an advanced co-operative society, where every action feeds back into the true Service-to-Others (STO) abundance network of the human collective for all sovereign human beings operating as autonomous individuals.

7.8. Section 7.8 The Learn/Teach and Teach/Learn Educational Mandate

The Association declares that the only activity worth doing is the sacred, cosmic law of Learn/Teach and Teach/Learn. To enforce this, the entire planetary network of localised manufacturing units, assembly hubs, and sanctuaries shall function fundamentally as alternative educational environments for a light-bearing new generation of entrepreneurs, innovators, engineers, technicians, and DIY builders to proliferate the applications of the breakthrough RA-Energy Theory in other fields for exponential progress and acceleration of mass human consciousness.

7.9. Section 7.9 The Absolute Export Ban Mandate For Manufacturers

As a condition of the manufacturing licence, and in compliance with applicable competition law, manufacturers are strictly and fundamentally banned from exporting the RA-Energy device to any nation independent of its localised membership status. Every nation must establish its own sovereign membership and manufacture the RA-Energy device within its own domestic borders. This eliminates price wars stemming from national economic disparities, localised production costs and differences in skilled manufacturing talent, and enforces planetary geographic self-reliance.

7.10. Section 7.10 Share-Alike Innovation and Loophole Protection

The Association explicitly prohibits the use of aggressive patent trolling or the exploitation of legal loopholes in patent laws to privatise modifications built on the base technology.

7.10.1. Creative Commons Share-Alike Architecture

Any technical improvement, manufacturing process optimisation, cost reduction, or secondary product line developed by any member, validator, or consultant must be shared instantly and openly with all manufacturers across the planetary ecosystem under a strict share-alike framework, such as Creative Commons Share-Alike or an equivalent open hardware licence.

7.10.2. Operational Parity

In the sharing of knowledge and mutual support, cooperation permanently replaces cut-throat Service-to-Self (STS) competition, in compliance with applicable competition law, while every member remains free to strive for excellence and, once it is achieved, shares it with all in the true Service-to-Others (STO) spirit. All members are legally bound to support, assist, and hold the hands of weaker or developing manufacturing parties to lift them up into total operational parity.

8. ARTICLE VIII: PUBLIC VERIFICATION, EXHIBITION AND STRUCTURAL IMMUNITY

8.1. Section 8.1 The Cultural Space Strategy for Strategic Immunity

Prior to any public open-sourcing or public ledger deployment, a fully functional operational prototype of the RA-Energy device must be exhibited within prominent, neutral planetary cultural institutions. This strategy seeks to place the early-stage prototypes under international laws protecting artistic expression, academic freedom, and cultural property, establishing an absolute shield that insulates the technology from premature utility grid crackdowns or commercial product classification rollbacks.

8.2. Section 8.2 Mandatory Switzerland, Egypt and India (Bharat) Exhibition Milestones

The Association mandates the execution of the public verification protocol through the following specific institutional installations, subject to the agreement of the host institutions. Where a named institution declines, the Board of Trustees may designate an equivalent cultural institution in the same nation.

8.2.1. Art Basel (Canton of Basel-Stadt, Switzerland)

The device shall be displayed as a live, interactive kinetic-electrical installation, allowing any sovereign human being operating as an autonomous individual, scientist, or media representative to personally witness and verify the veracity of the breakthrough electromagnetic energy device.

8.2.2. Fondation Beyeler (Riehen/Basel)

The prototype shall transition into a special exhibition or the permanent collection to serve as an un-suppressible, public institutional archive.

8.2.3. Grand Egyptian Museum (GEM) / Aisha Fahmy Palace

The Middle Eastern leg of the validation protocol shall be executed within Egypt's premier cultural spaces as an avant-garde environmental kinetic sculpture. Following its initial presentation, the operational prototype shall transition permanently into the permanent collection or permanent public archive of the host institution, establishing a secure, un-suppressible baseline of public and state awareness in the Middle East.

8.2.4. National Gallery of Modern Art (NGMA) / Kiran Nadar Museum of Art (KNMA), New Delhi

The Eastern leg of the validation protocol shall be executed within India's premier cultural spaces as an avant-garde environmental kinetic sculpture. The deployment mandates the permanent acquisition of the physical device infrastructure into the permanent collection or state-protected public archives of the designated institution, establishing a secure, un-suppressible base of public and state awareness in the East that seeks to be legally insulated under sovereign cultural property frameworks.

8.3. Section 8.3 The Triple Key Public Domain Dissolution Trigger

The complete engineering blueprints, manufacturing schematics, and underlying technical know-how owned by the Association and held in stewardship by the Board of Trustees shall dissolve automatically and entirely into the public domain if, and only if, the following six milestones are achieved.

8.3.1. The 144,000 General Public Use Milestone

A minimum of 144,000 devices must be acquired independently by individual sovereign human beings operating as autonomous individuals directly via the sovereign blockchain utilising the RA-Energy Utility Token for personal use and verification within each of Switzerland, Egypt and India, safeguarding against the persecution of other members across Planet Earth who are already using the technology privately.

8.3.2. The 144,000 State Infrastructure Mandate

A minimum of 144,000 devices must be acquired natively by the government of each of Switzerland, Egypt and India via the sovereign blockchain utilising the RA-Energy Utility Token. To satisfy this mandate within the boundaries of state treasury compliance, each government must formally establish or utilise a legal asset-tokenisation gateway or regulatory framework that permits the state procurement of Virtual Digital Assets, standing as no exception to the token purchase mandate. These units must be fully operational across municipal, administrative, and government offices within its own territory to satisfy the nation-state living proof mandate.

8.3.3. The 180 Days Verification Filter

In each of Switzerland, Egypt and India, at least 144,000 of the units utilised by sovereign human beings operating as autonomous individuals and at least 144,000 of the units utilised by the member state must operate continuously and flawlessly for one hundred eighty (180) consecutive days without component degradation, backed by a formal, signed, written, and irrevocable testimony once issued by the utilising sovereign human being operating as an autonomous individual or the utilising member state for every such unit. A defective unit may be replaced, and the replacement counts once it has completed the same verification period.

8.3.4. The Number of MSME Manufacturing Factories

A minimum of nine (9) Micro, Small, and Medium Enterprises (MSMEs) within Switzerland, thirty-six (36) within Egypt, and one hundred forty-four (144) within India must be actively manufacturing functional, blockchain-verified decentralised RA-Energy device hardware units, with each facility operating continuously, effectively, and efficiently for a minimum duration of one (1) year.

8.3.5. Triple Sovereign Legalisation

The technology must obtain formal sovereign acceptance and legal clearance for open distribution within each of the West (Swiss Federal/Cantonal authorities), the Middle East (Government of Egypt via Al-Jaridah Al-Rasmiyah) and the East (Government of India via official Gazette notification), ensuring DIY builders face zero risk of legal prosecution.

8.3.6. The 144,000 Native RA-Energy PoW Node Milestone

A minimum of 144,000 native RA-Energy PoW nodes across Planet Earth, including at least 24,000 in each of Switzerland, Egypt and India, must be hosted entirely on localised, self-powered servers owned, protected, and independently maintained by the sovereign human beings operating as autonomous individuals themselves.

9. ARTICLE IX: NATION-STATE LEGALISATION AND ACCESSION UN-CANCELLABLE, NON-NEGOTIABLE COVENANTS

9.1. Section 9.1 The Sovereign Treaty Accession Framework

To legally deploy, manufacture, or integrate the RA-Energy ecosystem within any domestic territory, the respective Nation-State government must formally and legally execute a Bilateral Accession Covenant with the Association. By signing the Covenant, the Nation-State commits its sovereign legislative power to enforce the following baseline structural requirements. Upon accession, a national RA-Energy association shall be established in the acceding Nation-State, with statutes mirroring these Statutes, the Nation-State adapting its laws where necessary, and shall become a member of the Association.

9.2. Section 9.2 The Sovereign Token Mandate for Nation States

No entity is exempt from the Sovereign Token Mandate (Section 7.3), including nation-state governments. If a government desires this technology for self-power reliance and the true welfare of its citizens, it must adopt the RA-Energy Utility Token for this purpose. The ecosystem shall grow organically through total alignment with the Service-to-Others (STO) government energetic signatures that every administration claims to possess.

9.3. Section 9.3 RA-Energy Living Proof Mandate for Nation States

9.3.1. Localised Administrative Enforcement Mandate

All government office buildings, including the official residences provided by the state to every government minister and public official, must be run and powered one hundred percent (100%) exclusively by decentralised RA-Energy device hardware units acquired natively via the sovereign blockchain. The acceding Nation-State shall permit all participating entities to operate one hundred percent (100%) off-grid on RA-Energy devices. To this end, it shall remove, for everyone, any legal obligation to maintain an active connection to the public electricity grid, and shall progressively dismantle the legacy transmission infrastructure until every home and appliance is self-powered and no wiring is required. Picture Planet Earth without wires.

9.3.2. The Public Transport Mandate

Auto-rickshaws, taxis, buses, trucks, commercial vehicles, trams, the rail network, water, and air transportation must transition entirely to the native technology stack.

By completely eliminating fuel overheads and legacy energy dependencies, this structural transition serves to systematically collapse the baseline operational costs of all public and commercial transit networks. This fundamental shift frees the entire transportation framework from inflation and zero-sum financial strain, instantly unlocking massive Service-to-Others (STO) economic abundance and mobility for all sovereign human beings operating as autonomous individuals.

9.4. Section 9.4 The Absolute Right to Organic Nourishment Mandate

The Association declares that access to natural, GMO-free, organic food is a fundamental, unalienable right; without nourishment, no human being can survive or function properly.

To honour this common-sense truth, the retail price of food across all member states must be decoupled entirely from legacy transportation and fuel overheads. The cost of basic sustenance shall reflect solely the fair, localised cost of producing organic

nourishment itself, ensuring that healthy, untainted food remains universally accessible and affordable to the entire human collective.

9.5. Section 9.5 RA-Energy Ecosystem Essential Services Mandate

Every acceding Nation-State must embed the ecosystem within its state-level frameworks to mandate the RA-Energy Ecosystem as an Essential Service to protect human collective energetic alignment.

9.6. Section 9.6 Subsidies, Grants and Value-Added Tax (VAT) Parity

Any participating member state must formally agree to classify the RA-Energy device as an essential commodity.

9.6.1. Zero-Tax Supremacy Mandate

The statutory Value-Added Tax (VAT), sales tax, or localised transaction tariff for the decentralised RA-Energy device hardware units must be permanently fixed at a baseline rate of zero percent (0%).

Under no circumstances may the tax burden match or track legacy gasoline or fossil-fuel utilities, ensuring that the economic cost of energy delivery remains permanently optimised at the absolute lowest possible threshold for the public.

9.6.2. Subsidy Reallocation

All state-level subsidies, R&D grants, environmental grants, and tax credits traditionally allocated to legacy green technologies (such as solar energy infrastructure and solar panels) must be provided to the RA-Energy device at least equally, if not more generously, to accelerate human collective energy liberation.

9.6.3. Accelerated Supply Chain Clearance

The state must enforce a zero customs duty mandate and an expedited logistics clearance path on all imported Capital Goods and Bill of Materials (BOM) intended for

RA-Energy manufacturing facilities, provided a suitable alternative is not natively available within that specific Nation-State.

9.7. Section 9.7 The Anti-Taxation and Predatory Tariff Protection Mandate

The acceding Nation-State is strictly and perpetually prohibited from levying, increasing, or enforcing any form of sales tax, customs duties, or arbitrary electronic luxury tariffs on the acquisition, manufacturing, or operation of the decentralised RA-Energy device hardware units and the RA-Energy Utility Token.

To permanently insulate the ecosystem from the greed of institutional advisors operating under Service-to-Self (STS) signatures, the financial value generated by the Service-to-Others (STO) abundance economic network must remain entirely untaxed, ensuring that the fruits of technology belong exclusively to the human collective without state-sponsored siphoning.

9.8. Section 9.8 The Predatory Anti-Income Tax and Capital Gains Tax Protection Mandate

In the medium-of-exchange phase, the RA-Energy Utility Tokens are the people's medium of exchange, powered by their common belief in their intrinsic value. The financial value generated by the Service-to-Others (STO) abundance economic network must remain entirely untaxed, free from any personal income tax and capital gains tax or any new tax, ensuring that the fruits of technology belong exclusively to the human collective without state-sponsored siphoning.

9.9. Section 9.9 Liquidity Pool Orchestration for Nation Fiat Currency Swap

The state must formally recognise and legally authorise the immutable, mathematically sound, non-volatile swap protocol allowing its fiat currency to be seamlessly exchanged for the RA-Energy Utility Token and vice versa via non-custodial networks. The state must explicitly and formally recognise the RA-Energy Utility Token as a lawful medium of

exchange and payment token within its territory, and establish the regulatory framework required for this function. The legal recognition granted by the first acceding Nation-State shall serve as the reference model for all subsequent accessions.

9.10. Section 9.10 Higher Education Mandate

The state must integrate the RA-Energy Textbook, underlying advanced physics, and technological methodologies into formal, mainstream Higher Education curricula and university research structures across the nation-state.

9.11. Section 9.11 Anti-Monopoly Decentralised Territorial Self-Reliance

To permanently prevent the consolidation of power by centralised corporate entities and cartels, the Association requires that production remain fundamentally decentralised, localised, and horizontally distributed across every nation-state.

Strict restrictions on the export of physical devices between territories shall be enforced to ensure that every nation is forced to become entirely self-reliant, eliminating price wars stemming from national economic disparities and localised production costs, not to mention low-quality products with built-in planned obsolescence.

9.12. Section 9.12 The Absolute Export Ban Mandate

The Nation-States are strictly and fundamentally banned from exporting the RA-Energy device to any nation independent of its localised membership status. Every nation must establish its own sovereign membership and manufacture the RA-Energy device within its own domestic borders to enforce planetary geographic self-reliance.

9.13. Section 9.13 The Absolute Import Ban Mandate

To permanently prevent the consolidation of power by centralised corporate entities and cartels in non-member Service-to-Self (STS) states, who are entirely free to copy, pirate, and reverse-engineer the RA-Energy device to develop proprietary know-how outside the

RA-Energy ecosystem once the technology enters the public arena, all acceding Nation-States are strictly and fundamentally banned from importing any RA-Energy devices, RA-Energy-specific components, or cloned variations manufactured within non-member jurisdictions. General-purpose components and raw materials are not affected by this ban.

The Association explicitly acknowledges and welcomes unauthorised copying by external corporations in non-member Service-to-Self (STS) states, as it directly brings forth the systemic collapse of the legacy grid within those non-member Service-to-Self (STS) states.

9.14. Section 9.14 Rejection of Predatory Aid

The structural goal is to nurture the weak and make them autonomous, rather than making them dependent under hidden motives of control. The Association explicitly identifies the historical framework of foreign aid, artificial debts, and asymmetric export trade deals as a Service-to-Self (STS) energetic signature wrapped inside a Service-to-Others (STO) packaging, and prohibits its practice within the community ecosystem.

9.15. Section 9.15 The Absolute Ban for Usage in Military-Industrial Complex

The RA-Energy is a gift to humanity from Service-to-Others (STO) 6th-Density Light beings. We must use it only for the well-being of all sovereign human beings operating as autonomous individuals on Planet Earth and not for killing sovereign human beings operating as autonomous individuals of other Nation-States. This is a process of operating in correct mind and action.

War for peace is an absolute oxymoron inversion by Service-to-Self (STS) governments justifying their actions with their fear-based blanket of lies and false flag events to control public perception and public support, which everybody has witnessed in recent world events. The so-called "good guys" are hell-bent upon repeating the past actions of the Western Alliance who did elect the "final" option to annihilate and kill the innocent and helpless populations of Hiroshima and Nagasaki as if the constructed enemy attack of the Pearl Harbour incident could in any way justify the final response. While the Hitler story

resounds endlessly across the waves of human consciousness, almost nowhere does one find reference to the atomic devastation unleashed by the "good guys" of that war.

10. ARTICLE X: THE AUTOMATED SMART-CONTRACT REWARD MATRIX

10.1. Section 10.1 Immutable On-Chain Transactional Settlement

Every physical device transaction processed on the decentralised parallel ledger via an authentic NFT provenance tag shall trigger an automated, unalterable smart-contract distribution of the tokenised transaction value. To maintain an economy of absolute Service-to-Others (STO) abundance and eliminate centralised human counterparty risks, the settlement architecture enforces the following strict allocation parameters:

10.1.1. 40% for Total Manufacturing Cost Escrow

Locked instantly and exclusively to automatically finance and purchase the next batch of raw components from approved planetary suppliers, guaranteeing an uninterrupted flow of hardware to new members.

10.1.2. 10% for the Manufacturer Reward

Routed directly and instantly to the specific decentralised MSME unit responsible for manufacturing that specific unit.

10.1.3. 20% for the Community Service-to-Others (STO) Abundance Pool

Formally escrowed and distributed monthly to verified active participants across Planet Earth, in proportion to their active participation in the ecosystem under the Living Proof Mandate, in the form of utility credits redeemable for RA-Energy devices and services, as a direct reward for sustaining the Service-to-Others (STO) abundance model.

10.1.4. 10% for The Charity & Legal Shield Pool

Dedicated entirely to general Service-to-Others (STO) endeavours across Planet Earth and the absolute financial and legal protection, within the limits of the law, of any community light bearer facing regulatory, political, or corporate persecution in any territory.

10.1.5. 10% for The Working Capital Pool

Utilised to finance the upfront raw materials and BOM requirements for expanding manufacturing plants. This pool explicitly acts as bad-debt insurance to absorb losses caused by non-compliant Service-to-Self (STS) manufacturers who attempt to sell counterfeit variants off-chain.

10.1.6. 10% for The Sovereign Governance Treasury

Allocated directly to the sovereign governance treasury of the Association, administered by the Board of Trustees operating under the sovereign governance framework, to fund strategic security deployments, digital shielding assets, and planetary operations.

11. ARTICLE XI: THE PRIVATE MEMBERSHIP DUAL-LAYERED GATING AND SPIRITUAL CLEARANCE ONBOARDING PROTOCOL AND MANDATE

11.1. Section 11.1 The Dual-Gateway Non-Discrimination Mandate

The Association enforces a strict non-discrimination Mandate. There are no reservations, admissions, or divisions based on age, sex (male/female), form, colour, social class, social status, religion, caste, creed, sexual orientation, or any other artificial division of the human collective. All humans are equal, and all life is equally important.

To accommodate varying states of individual readiness, every sovereign human being operating as an autonomous individual has the absolute choice to join the collective either as a private member or a public member at the commencement of their onboarding.

11.2. Section 11.2 The Dual Public-Private Operational Matrix

The Association acknowledges that absolute total privacy is structurally incompatible with planetary liaison communication and public cultural installations. To resolve this, a dual-layer architecture is established.

11.2.1. The Public Layer

The Board of Trustees, the Operational Advisory Teams tasked with public deployment (specifically the Legal Advisors and Canton of Vaud Interaction Team, the Swiss

Government Interaction Team, and the Art Basel and Fondation Beyeler Interaction Team), along with any STO-qualified Scientific Commission members who choose public visibility, shall operate transparently within the public commercial and civil domains. They serve as the legal shield, anchoring the Association's mundane status under Article 60 of the Swiss Civil Code.

11.2.2. The Private Sanctuary Layer

Active creators, DePIN validation node operators, internal Scientific Commission members active within mainstream institutions (until the public release at Art Basel, as set out in Section 3.4), and general collective users who choose private membership reside within the private domain governed by the Private Membership Agreement (PMA) or Private Support Agreement (PSA), totally insulated from public registration, except where disclosure is required by law. Upon the accession of a Nation-State under Article IX, private members residing in that Nation-State transition to the Public Layer. By choosing private membership, each member consents in advance to this transition.

11.3. Section 11.3 Multi-Currency Onboarding & Universal Shield Protection

To accommodate the freewill wishes of all incoming private members and general supporters, the Association structures a flexible contribution matrix managed under strict asset shielding rules.

11.3.1. Base Currency Anchor

The Swiss Franc (CHF) serves as the primary baseline currency anchor for all financial donation calculations across the planetary ecosystem.

11.3.2. Multi-Currency Acceptance Matrix

To ensure fluid onboarding, the Association explicitly authorises the acceptance of equivalent donation values processed in Euro (EUR), United States Dollar (USD), and British Pound (GBP), calculated dynamically at the time of the transaction to strictly honour the established donation caps.

11.3.3. Public Supporter Tracking (Fiat)

General external backers who wish to support the planetary shift may execute their freewill contributions through traditional, legacy public Fiat currency networks.

11.3.4. Private Member Tracking (USDT)

Fully onboarded private members who wish to contribute funds to support the mission may execute their freewill donations natively using USDT (Tether) across decentralised blockchain settlement rails, in compliance with applicable anti-money-laundering rules.

11.4. Section 11.4 The Intuitive Donation Matrix

The Light-Bearing applicant supports the Association through a financial donation driven entirely by their own inner calling to build a cooperative culture of light.

11.4.1. Driven by Resonance, Not Obligation

Giving is entirely intuitive. The contribution is made because the movement vibrates with the applicant's soul, executed with joyful detachment from public praise or commercial expectations.

11.4.2. Values in Action

The donation serves as a tangible extension of the spirit, shifting the relationship with wealth from ownership and scarcity into a fluid model of spiritual stewardship.

11.4.3. Membership Contribution

Each member pays a membership contribution, the amount or form of which is freely chosen by the member according to their inner calling, whether in funds, voluntary work or in-kind support, provided that it amounts to something and that any financial contribution does not exceed the caps set out below.

11.4.4. The 1,728 CHF Cap

Subject to the Large Donations clause below, a maximum one-time payment equivalent to one thousand seven hundred twenty-eight (1,728) CHF shall be enforced, payable in fiat currency for the Public Interface Layer and in USDT for the Private Sanctuary Layer.

The maximum regular monthly payment shall be fixed at the equivalent of one hundred forty-four (144) CHF for continuous support.

11.4.5. Large Donations

Only individuals with a verified Service-to-Others (STO) signature of seventy-five percent (75%) or higher can make large private donations, subject to further Narrow-Band Channeling energetic clearance for each specific large donation, to ensure that it is a genuine act of true philanthropy to accelerate the evolution of mass human consciousness.

11.4.6. Voluntary Work and In-Kind Support

Light-bearing supporters and members may apply to contribute voluntary work in any field of interest or expertise, or in-kind support, to actively support the RA-Energy Association.

11.5. Section 11.5 The Absolute Protection Covenants

The Legal Advisors and Canton of Vaud Interaction Team is strictly mandated to structure and format all financial inflows, in compliance with applicable law, as private, protected acts of philosophical and energetic alignment under Article 60 of the Swiss Civil Code.

In the event of external geopolitical anomalies, arbitrary state-level overreach, or weaponised asset freezes, the Board of Trustees and the Blockchain Advisory Team must automatically activate the emergency cryptographic asset shielding protocols defined in Section 4.7, within the limits set out there, to fully protect the anonymity, travel freedom, and capital reserves of all contributors across both the Fiat and USDT pathways.

11.6. Section 11.6 Spiritual Clearance Onboarding Protocol

During the initial operational phases, to insulate the ecosystem from premature systemic corruption and commercial weaponisation, access to the Association's core private research databases, manufacturing blueprints, and cryptographic modules is strictly conditional upon the satisfaction of this protocol, which is divinely orchestrated to

exclusively attract, activate, and interface with Light-bearing Service-to-Others (STO) awakened Star Seeds, Old Souls, Super Souls, Indigo Children, Wanderers, and Volunteers.

The Board of Trustees exercises absolute, sovereign, and un-appealable discretion over all member onboarding, utilising an internal dual-layered spiritual filter under strict divine principles and spiritual guidance from 6th-Density Light beings.

The dual-layered spiritual filter acts purely as a spiritual admissions criterion for university-level energetic alignment. It is not discrimination. Discrimination constitutes an inversion of divine principle and is one of the seven essential "ingredients" of the Service-to-Self (STS) playbook "The Recipe".

The key to success is in expansive outward movement and those without commitment to carry the "Letter to Garcia" do not impede this essential outward expansion.

11.7. Section 11.7 Narrow-Band Channeling Layer

The candidate's primary frequency is validated through narrow-band channeling with 6th-Density Light Beings, ensuring their current incarnation operates purely on the Service-to-Others (STO) vibration.

Narrow-band communication is a highly specialised talent. There are only a handful of entities on Planet Earth at the present time who are capable of holding Narrow-Band Channeling with 6th-Density Light Beings, though there are many entities who are able to do wide-band channeling with 4th-Density and 5th-Density entities.

The target audience possessing the required STO signature shall intuitively resonate with it and maintain a natural bias toward its truth. While it cannot be classified as "true knowing", it functions as a deep, undeniable bias and intuitive resonance.

Any submission of fraudulent birth date, time and place or masked biographical information shall expose itself during Narrow-Band Channeling. Providing false information results in automatic, self-inflicted disqualification.

11.8. Section 11.8 Vedic Birth Chart Alignment Layer

The candidate's exact birth date, time and place are mapped to verify their karmic path, structural integrity, and lineage alignment with the planetary liberation timeline.

To clear away labels of "pseudo-science" born out of structural ignorance, institutional dogmas, and carefully engineered control mechanisms to keep sovereign human beings operating as autonomous individuals away from sacred science that empowers the human spirit, the Association clarifies the exact scientific mechanics of Vedic astronomical charting.

A birth chart is a blueprint of Spacetime Coordinates, an exact mathematical snapshot of the local universe's vector geometry at the precise time a sovereign soul enters the planetary density and takes the first breath.

Just as modern physics utilises coordinates to chart a trajectory through spacetime, the Vedic Horoscope maps the life-path journey of an electromagnetic human being.

It represents veiled freewill pre-incarnative choices and karmic initial conditions, personality traits, under which the physical incarnation materialised, and the evolutionary potentials and vibrational blueprints of the soul journey on Planet Earth as it constantly interacts with the electromagnetic influences of our Local Sun Logos and its planets transiting through the zodiac and constellations.

Thus, those who know the stars and their configurations and influences are able to see a rather broadly drawn map of the country through which an entity has traveled, is traveling, or may be expected to travel, be it upon the physical, the mental, or the spiritual level.

11.9. Section 11.9 Consent and Data Protection

Each candidate gives explicit written consent to the processing of their birth data and of the spiritual assessments under Sections 11.7 and 11.8, solely for the purpose of onboarding, in accordance with the Swiss Federal Act on Data Protection (FADP). This data is kept strictly confidential and is not disclosed, except where required by law.

11.10. Section 11.10 Successful Alignment

Applicants demonstrating a verified Service-to-Others (STO) signature of 75% or greater are authorised to execute the full Private Membership Agreement (PMA) to become active members. For technicians, engineers and prototype builders engaged in specific technical tasks, the minimum threshold is sixty percent (60%). They may choose whether their operational data remains entirely private, subject to Section 11.2, or anchors to the Public Interface Layer to act as a compliance shield.

11.10.1. Secondary Conversion Pathway

If the applicant's current energetic signature drops below the 75% Service-to-Others (STO) threshold, their active application is automatically converted into an offer of Private Support Agreement (PSA) status. On accepting it, they are granted a passive sanctuary status to support the movement while shielding themselves from public exposure, subject to Section 11.2. Supporters under the Private Support Agreement (PSA) are not members of the Association. The Board of Trustees may terminate any PSA at any time, without stating reasons.

11.11. Section 11.11 Unsuccessful PMA Applicants

Unsuccessful PMA applicants are warmly encouraged to work diligently on their inner self, clearing and balancing their primary energy centres (chakras), and are welcome to reapply for active status after a minimum healing period of six (6) months.

12. ARTICLE XII: THE PRIVATE COUNCIL OF NINE GOVERNANCE AND MEDITATIVE COVENANTS

12.1. Section 12.1 The Private Council of Nine

The Private Council of Nine shall consist of nine (9) members, each possessing a verified vibratory Service-to-Others (STO) signature of 95% or higher. The members are appointed by the Trustee Guardian under the same divine principles and spiritual guidance as the Scientific Commission (Section 3.4). Initially, the two Trustees form the Council, and qualified members join as they are appointed. Once three (3) qualified members have joined, the Trustees withdraw, and the Council continues with its qualified members, growing until all nine (9) seats are filled. Where more qualified members are available, regional or national Councils may be established on the same model. The prominent duties of the Private Council of Nine are strictly defined as follows:

12.1.1. Unification of Compassion and Wisdom Aid Allocation

To allocate funds on behalf of the Association to sovereign entities requesting aid from the Charity & Legal Shield Pool (10%) in a manner consistent with the Law of One.

12.1.2. Spiritual Advisory

To offer clear guidance to members of both the Private Sanctuary Layer and the Public Interface Layer who are unsure how to serve entities requesting aid in a manner consistent with the Law of One.

12.1.3. Internal Assembly

To democratically determine and resolve internal questions within the council itself in a manner consistent with the Law of One.

12.1.4. Mediation and Dispute Resolution

To facilitate mediation and absolute dispute resolution between members of both the Private Sanctuary Layer and the Public Interface Layer in a manner consistent with the Law of One.

12.1.5. Proliferation of the Law of One

To proliferate the Law of One to increase the Service-to-Others (STO) harvest and for the evolution of consciousness.

12.2. Section 12.2 Governance and Meditative Covenants

In the event of a relational difference or explicit dispute between two or more members for any reason, the energetic Service-to-Others (STO) signatures of all members involved in the event shall be verified immediately.

12.2.1. Termination Threshold

If the verified energetic signature of any active member under the Private Membership Agreement (PMA) drops below the threshold applicable to them under Section 11.10 (75%, or 60% for technicians, engineers and prototype builders), their membership within the Association is terminated immediately. In all other cases, the dispute is resolved through mediation by the Council.

12.2.2. The Absolute Forgiveness and Forbearance

This action is executed without grudges, without emotional charge, and with full, absolute forgiveness and forbearance to the parting member, respecting their free-will choice to change the direction of their spiritual path.

12.2.3. The Rehabilitation Protocol

Parting members who failed to qualify under the baseline Service-to-Others (STO) energetic signature filters are advised to work diligently on their inner self, clearing any blockages in their Energy centres (Chakras) and balancing them to help them advance in Service-to-Others (STO) pathways. They are warmly encouraged to reapply for active status after a minimum healing period of six (6) months.

13. ARTICLE XIII: GOVERNANCE AND GENERAL ASSEMBLY POWERS

13.1. Section 13.1 Structural Amendments and Administrative Consensus

The General Assembly is the supreme body of the Association within the meaning of Article 64 of the Swiss Civil Code. The two Founding Trustees are the voting members of the Association and together constitute the General Assembly; all other members are non-voting members. The General Assembly retains absolute and exclusive authority, subject only to mandatory law, to amend, refine, or update these statutes at any time to adapt to a fluid operational environment or to neutralise external systemic threats.

Any structural updates, text modifications, or corporate resolutions shall be formally ratified by executing a written resolution signed by both Founding Trustees in the physical realm (Article 66 paragraph 2 of the Swiss Civil Code), which requires a total and absolute quorum of both founding Trustees, and recorded as Minutes. Once executed, these resolutions enter into force immediately, automatically modifying the operational protocols of the Association without requiring public registration or external state notification, except where required by law.

13.2. Section 13.2 Maintenance of the Master Minutes Book

All formal administrative resolutions, determination of quorums, and corporate actions executed by the General Assembly and the Board of Trustees shall be recorded sequentially within a dedicated Master Minutes Book maintained at the official physical domicile of the Association.

These written records, when executed under the wet-ink signatures of the Trustees, serve as the ultimate prima facie legal proof of internal corporate consensus and administrative compliance under Article 60 of the Swiss Civil Code, supporting all external banking, tax, and auditing verification requirements.

13.3. Section 13.3 Right to Leave

Every member may leave the Association at any time by written notice to the Board of Trustees. Obligations incurred before leaving remain unaffected; in particular, the confidentiality, non-use and intellectual property obligations under the Private Membership Agreement (PMA) remain in force after leaving.

14. ARTICLE XIV: FINANCIAL LIABILITIES AND ASSETS

14.1. Section 14.1 Personal Financial Exoneration

The financial commitments and liabilities of the Association are strictly limited to and guaranteed solely by the corporate assets of the Association. Sovereign individuals operating as autonomous members, creators, or validators bear zero personal liability for the actions, debts, contracts, or obligations of the Association.

The founding Board of Trustees (Anil Goel and Joyti Goel) are fully, completely, and perpetually exonerated, to the extent permitted by law, from any personal financial liability or individual financial exposure resulting from their administrative stewardship, corporate management actions, or signing authority executed in the name of the Association.

14.2. Section 14.2 Resources and Finances

The resources of the Association consist of membership contributions and donations under Section 11.4, grants under Sections 3.12 and 3.13, proceeds of the RA-Energy Utility Token and allocations under Article X, in-kind support, and any other lawful income. All resources are used exclusively for the purpose of the Association. No surplus is distributed to members.

The financial year corresponds to the calendar year. The Association keeps its accounts in accordance with Article 69a of the Swiss Civil Code. An auditor is appointed where required by law.

15. ARTICLE XV: RESERVED / ADMINISTRATIVE SCHEDULING

15.1. Section 15.1 Reserved for Future Protocol Expansion

This article is explicitly reserved by the General Assembly for future administrative schedules, network operational updates, or specific regulatory frameworks that may require integration as real-world planetary energetic and legal alignments progress.

15.2. Section 15.2 Maintenance of Structural Numbering Integrity

Until an explicit operational schedule or regulatory annex is ratified and enacted by the General Assembly under this article, this section serves strictly as a functional placeholder to preserve the immutable numerical and sequential integrity of these statutes.

16. ARTICLE XVI: DISSOLUTION AND LIQUIDATION

16.1. Section 16.1 Absolute Non-Profit Asset Devolution upon Dissolution

In the event that the Association is formally dissolved by a unanimous resolution of the General Assembly, the liquidation process shall be handled entirely in accordance with Articles 57 and 58 of the Swiss Civil Code. All remaining capital, technology reserves, and physical assets after the complete settlement of all legitimate outstanding liabilities shall be transferred entirely and exclusively to a registered, tax-exempt Swiss non-profit organisation or foundation that pursues a public utility purpose similar to the acceleration of human consciousness, universal energy freedom, and ecological liberation. The return of any residual capital or assets to the founders, individual members, or donors is strictly and permanently prohibited.

16.2. Section 16.2 Automatic Public Domain Release and Poison Pill Covenant

Notwithstanding any provision to the contrary within these statutes, in the event of any external attempt to force an involuntary liquidation, any hostile state or judicial intervention, or any internal infiltration attempting to dissolve the Association to seize or hoard its technical assets, all intellectual property, advanced physics models, software source code, mathematical paradigms, and physical prototyping blueprints shall be released immediately and permanently into the public domain for the benefit of the human collective, subject to mandatory law. No party shall then be able to seize, privatise, or hoard this technology.

17. ARTICLE XVII: CLOSING RATIFICATION AND ENTRY INTO FORCE

17.1. Section 17.1 Entry into Force

These statutes were formally adopted on 1 October 2026 by the Founding Trustees, constituting the General Assembly, and came into force immediately upon their execution. All covenants, asset shields, operational caps, and spiritual alignment filters outlined within this master document are declared active, binding, and immutably sealed within the private realm.
